

**Department of Toxic Substances Control
Project Status Update
For
Wyle Laboratories Norco Facility Site
August 16, 2004**

SITE INVESTIGATION/CLEANUP DOCUMENTS

- Wyle submitted analytical results for the latest round of groundwater treatment system effluent testing. DTSC is evaluating the results.

INVESTIGATION/CLEANUP FIELD WORK

- DTSC's project team visited Wyle to inspect and evaluate sampling locations proposed in the draft Remedial Investigation Workplan. DTSC staff and Environ modified sampling locations and/or added additional locations/analyses in Areas A, B, C, D, M and I. DTSC will complete its inspection of all other areas within two weeks.

PUBLIC PARTICIPATION:

- DTSC staff visited residents along Golden West Lane where in-door air sampling is anticipated. Staff discussed sampling procedures and access requirements with the residents.
- DTSC staff prepared for the Community Meeting on August 16, 2004.
